ANNUAL SUBJECT INDEX

ANSI standard 'C',
MOTIF/PATTERN, protein/DNA sequences scanning, IBM PC/AT 227
ANTHEPROT,
Apple Macintosh/IBM PC versions 159
Apple IIe,
CLEAVAGE, signal sequence cleavage site prediction, Applesoft BASIC 53
limiting dilution analysis, BASIC 161
Apple Macintosh,
ANTHEPROT 159
synthetic genes-design/analysis, MS-Basic 191
Applesoft BASIC,
CLEAVAGE, signal sequence cleavage site prediction, Apple IIe 53

Barcelonagram,
Monte Carlo simulation bacterial growth, FORTRAN 77/IBM 3083/XE 305
BASIC,
Fourier filtering, noise removal, IBM PC 137
LEHM, enzyme kinetic data analysis, IBM PC XT/AT 239
limiting dilution analysis, Apple IIe 161
BESTMULT/BESTMATCH,
multiple sequence alignment, homologous proteins, secondary structure information/optional keying, FORTRAN 77, VaxII/780 141

C language,
multiple sequence alignment, VAX/VMS 115
CHAMP,
protein structure analysis 299
Chaos,
dynamical systems, principles/implications 27
CLEAVAGE,
signal sequence cleavage site prediction, Applesoft BASIC, Apple IIe 53
CLUSTAL 4,
rapid multiple sequence alignment, FORTRAN 77, IBM AT 151
CORDAN,
FORTRAN 77, DNA–drug complex analysis 271
CORGEN,
FORTRAN 77, standard/non-standard DNA helices, complexes 279
Correspondence analysis,
contingency tables, PROC IML, IBM PC 183

Database,
bibliographic, Unix, IBM PC 245
EMBL/EMBOPRO, automatic translation program, nucleotide sequence/protein sequence 15
solubility data solubility data, nonelectrolytes 235
Database management,
recombinant DNA clones, FORTRAN 77, IBM PC/AT 321
DEC 2060/MicroVAX II,
DNA sequence similarities, statistical significance, FORTRAN 77, SUN-4 123
DNA,
drug complex, analysis, FORTRAN 77/CORDAN 271
sequence similarities, statistical significance, databank searches, MGS, FORTRAN 77, DEC 2060/MicroVAX II, SUN-4 123
DNA sequencing,
sequence data entry, keyboard/sonic digitizer input, GELENT, VMS Pascal, MicroVAX II 155
Drug design,
theoretical, TEFOOL/2, GW-BASIC, IBM-PC 219
DURY,
nematude identification, MS-DOS 2.0, IBM PC/XT/AT 243

Education,
problem generation, genetics, PATHS, GW-BASIC, IBM PC 55
ELBAMAP,
Turbo Pascal, IBM PC, banding data management, comparisions 313
EMBOPRO,
automatic translation program, EMBL database, protein sequence database 15
Enzyme,
kinetic data, fitting to Michaelis–Menten/Hill models, BASIC, IBM PC XT/AT 239
Ericsson PC,
MS-Ed-Seq, autoradiogram sequence editor, file transfer, Turbo Pascal 41
ESEE,
multiple sequence editor, nucleic acid/protein sequences, IBM PC 233

FAST,
protein structure analysis 299
File transfer,
MS-Ed-Seq, VAX 11/750 41
FORTRAN 77,
BESTMULT/BESTMATCH, multiple sequence alignment, homologous proteins, VaxII/780 141
CORDAN, DNA–drug complex analysis 271
CORGEN, standard/non-standard DNA helices, complexes 279
DNA sequence similarities, statistical significance, DEC 2060/MicroVAX II, SUN-4 123
IBM PC/AT, database management, recombinant DNA clones 321
image-processing package, genome mapping, VAX 8600 101
interactive protein sequence comparison, SUN 3/4, VAX/VMS, MICROVAX II/3200 107
motifs, probability-generating functions, VAX 8600 89
MULTAN (2), multiple string alignment, Unix-5 51
rapid multiple sequence alignment, CLUSTAL 4, IBM AT 151
SDSE, DNA sequence evolution—simulation of, IBM PC 47
VAX 8600/VMS, nucleotide sequences-new motifs 293
FORTRAN IV,
subroutine, inbreeding and kinship coefficients—calculation of 199
Fourier filtering,
noise removal, BASIC, IBM PC 137

GELENT,
sequence data entry, keyboard/sonic digitizer input, VMS Pascal, MicroVAX II 155
Genome mapping,
autoradiograms, image-processing package, FORTRAN 77, VAX 8600 101
GrafBar Model 7 sonic digitizer,
MS-Ed-Seq, autoradiogram sequence editor, Ericsson PC, Turbo Pascal 41
GraphMu,
Macintosh, multivariate data graphical display/collections 287
GW-BASIC,
PATHS, educational problem generation, genetics, IBM PC 55
POEAMS, Outliners elimination, 'anomalous' multidimensional space, Olivetti M-24 241
RNA secondary structure prediction, graph theoretical approach, IBM PC/AT 211
TEFOOL/2, theoretical drug design, IBM-PC 219

Hewlett Packard BASIC,
proteins, secondary structure predictions, HP7475 plotter 323

IBM 3083/XE,
Monte Carlo simulation bacterial growth, Barcelonagram, FORTRAN 77 305
IBM AT,
analysis protein structure, FAST/CHAMP, BASIC, IBM AT 299
HYLAS/FORTRAN, DNA H curves, graphic display 263
PRONET, Turbo Pascal, proteins, secondary structure prediction 319
rapid multiple sequence alignment, CLUSTAL 4, FORTRAN 77 151
IBM PC,
ANTHEPROT 159
bibliographic database 245
correspondence analysis, contingency tables, PROC IML 183
ESEE, multiple sequence editor 233
FORTRAN 77, database management recombinant DNA clones 321
Fourier filtering, noise removal, BASIC 137
HYLAS/FORTRAN, DNA H curves, graphic display 263
PATHS, educational problem generation, genetics, GW-BASIC 55
proteins, secondary structure predictions, HP7475 plotter 323
SDSE, DNA sequence evolution—simulation of, FORTRAN 77 47
Turbo Pascal, ELBAMAP, banding data management, comparisions 313
IBM PC AT,
SCAN, TOPOLOGY, oligonucleotide frequency distribution studies, Pascal 33
IBM PC XT,
Lotus 1-2-3, method comparison studies, BASIC, IBM PC XT 56
IBM PC XT/AT,
LEHM, enzyme kinetic data analysis, BASIC 239
IBM PC/AT,
RNA secondary structure prediction, graph theoretical approach, GW-BASIC 211
IBM PC/XT/AT,
DURY, nematude identification, MS-DOS 2.0 243
IBM-PC,
TEFOOL/2, theoretical drug design, GW-BASIC 219
Image analysis,
image-processing package, image analysis, autoradiograms, FORTRAN 77, VAX 8600 101

LEHM,
enzyme kinetic data analysis, Michaelis−Menten/Hill models-fitting to, BASIC, IBM PC XT/AT 239
Limiting dilution analysis,
BASIC, Apple IIe 161
Lotus 1-2-3,
method comparison studies, BASIC, IBM PC XT, 56

Macintosh,
MacMul, GraphMu, multivariate data graphical display/collections 287
Macintosh II,
MacPlasmap, circular plasmid maps drawing aid, Pascal 237
MacMul,
Macintosh, multivariate data graphical display/collections 287
MacPlasmap,
drawing aid, circular plasmid maps, Pascal, Macintosh II 237
Method comparison studies,
Lotus 1-2-3, BASIC, IBM PC XT, 56
MGS,
DNA sequence similarities, statistical significance, databank searches, FORTRAN 77, DEC 2060/MicroVAX II, SUN-4 123
MICROVAX II,
interactive protein sequence comparison, FORTRAN 77, SUN 3/4, VAX/VMS 107
sequence data entry, keyboard/sonic digitizer input, GELENT, VMS Pascal 155
Monte Carlo simulation,
bacterial growth, FORTRAN 77/IBM 3083/XE, Barcelonagram 305
Motifs,
probability calculation of, FORTRAN 77, VAX 8600 89
sequence, analysis, protein function determination 1
MOTIF/PATTERN,
motif and pattern scanning, protein/DNA sequences, ANSI standard 'C', Turbo C, IBM PC/AT 227
MS-Basic,
synthetic genes-design/analysis, Apple Macintosh 191
MS-DOS 2.0,
DURY, nematude identification, IBM PC/XT/AT 243
MS-Ed-Seq,
autoradiogram sequence editor, file transfer, GrafBar Model 7 sonic digitizer, Ericsson PC, VAX 11/750, Turbo Pascal 41
MULTAN (2),
multiple string alignment, FORTRAN 77, Unix-5 51
Multiple sequence alignment,
homologous proteins, secondary structure information/optional keying, BESTMULT/BESTMATCH, FORTRAN 77, VaxII/780 141
protein sequence, C language, VAX/VMS 115
rapid, protein/nucleic acid sequences, CLUSTAL 4, FORTRAN 77, IBM AT 151
Multiple sequence editor,
nucleic acid/protein sequences, ESEE, IBM PC 233
Multiple string alignment,
MULTAN (2), FORTRAN 77, Unix-5 51

Nematude,
identification, DURY, MS-DOS 2.0, IBM PC/XT/AT 243
Noise removal,
Fourier filtering, BASIC, IBM PC 137
Nucleotide sequences,
new motifs, FORTRAN 77, VAX 8600/VMS 293

Oligonucleotide,
frequency distribution studies, SCAN, TOPOLOGY, IBM PC AT/Olivetti M-24, Pascal 33
Olivetti M-24,
POEAMS, Outliners elimination, 'anomalous' multidimensional space, GW-BASIC 241
SCAN, TOPOLOGY, oligonucleotide frequency distribution studies, Pascal 33
Opus System V,
diffusion calculation, charge coupling—inclusion of, QuickBASIC 19
Outliners elimination,
'anomalous' multidimensional space, POEAMS, GW-BASIC, Olivetti M-24 241

Pascal,
MacPlasmap, circular plasmid maps drawing aid, Macintosh II 237
SCAN, TOPOLOGY, oligonucleotide frequency distribution studies, IBM PC AT/Olivetti M-24 33
PATHS,
educational problem generation, genetics, GW-BASIC, IBM PC 55
Plasmid maps,
drawing aid, MacPlasmap, Pascal, Macintosh II 237
POEAMS,
Outliners elimination, 'anomalous' multidimensional space, GW-BASIC, Olivetti M-24 241
PROC IML,
correspondence analysis, contingency tables, IBM PC 183
PRONET,
proteins, secondary structure prediction, Turbo Pascal, IBM AT 319

Protein function,
sequence analysis 1
Protein sequence,
comparison, interactive, FORTRAN 77, SUN 3/4, VAX/VMS, MICROVAX II/3200 107
multiple sequence alignment, homologous proteins, secondary structure information/optional keying, BESTMULT/BESTMATCH, FORTRAN 77, VaxII/780 141
sequence alignment, C language, VAX/VMS 115
Protein structure,
FAST, CHAMP, analysis 299
Proteins,
HP7475 plotter, IBM PC/Hewlett Packard BASIC 323
secondary structure prediction, PRONET, Turbo Pascal/IBM AT 319

QuickBASIC,
diffusion calculation, charge coupling—inclusion of, Opus System V 19

RNA,
secondary structure prediction, graph theoretical approach, GW-BASIC, IBM PC/AT 211
substructures comparison, TREE, VAX-Pascal, VAX 8600/VAX 785 205

SCAN,
oligonucleotide frequency distribution studies, TOPOLOGY, IBM PC AT/Olivetti M-24, Pascal 33
SDSE,
DNA sequence evolution—simulation of, FORTRAN 77, IBM PC 47
Secondary structure,
prediction, RNA, graph theoretical approach, GW-BASIC, IBM PC/AT 211
RNA substructures comparison, TREE, VAX-Pascal, VAX 8600/VAX 785 205
SED88,
sedimentation equilibrium data analysis, Turbo Pascal, Tandon PCX-10 133
Sequence,
motif and pattern scanning, protein/DNA sequences, MOTIF/PATTERN, ANSI standard 'C'/Turbo C, IBM PC/AT 227
Sequence comparison,
interactive, protein sequence, FORTRAN 77, SUN 3/4, VAX/VMS, MICROVAX II/3200 107
Sequence determinants,
splice site, analysis of 97
Sequence editor,
autoradiogram, MS-Ed-Seq, Ericsson PC, GrafBar Model 7 sonic digitizer, Turbo Pascal 41
multiple sequence editor, nucleic acid/protein sequences, ESEE, IBM PC 233
Sequence similarities,
DNA, statistical significance, databank searches, MGS, FORTRAN 77, DEC 2060/MicroVAX II, SUN-4 123
Signal sequence,
protein precursor, cleavage site prediction, CLEAVAGE, Applesoft BASIC, Apple IIe 53
Solubility data,
aqueous, database, nonelectrolytes 235
Splice site,
sequence determinants—analysis of 97
SUN 3/4,
interactive protein sequence comparison, FORTRAN 77, VAX/VMS, MICROVAX II/3200 107
SUN-4,
DNA sequence similarities, statistical significance, FORTRAN 77, DEC 2060/MicroVAX II 123
Synthetic genes,
design/analysis, MS-Basic, Apple Macintosh 191

Tandon PCX-10,
sedimentation equilibrium data analysis, SED88, Turbo Pascal 133
TEFOOL/2,
theoretical drug design, GW-BASIC, IBM-PC 219
TOPOLOGY,
oligonucleotide frequency distribution studies, SCAN, IBM PC AT/Olivetti M-24, Pascal 33
TREE,
RNA secondary structure comparison, VAX-Pascal, VAX 8600/VAX 785 205
Turbo C,
MOTIF/PATTERN, motif and pattern scanning, IBM PC/AT 227
Turbo Pascal,
ELBAMAP, banding data management, comparisions, IBM PC 313
MS-Ed-Seq, autoradiogram sequence editor, file transfer, GrafBar Model 7 sonic digitizer, Ericsson PC, VAX 11/750 41
PRONET, proteins secondary structure prediction, IBM AT 319
sedimentation equilibrium data analysis, SED88, Tandon PCX-10 133

Ultracentrifugation,
sedimentation equilibrium data analysis, SED88, Turbo Pascal, Tandon PCX-10 133
Unix,
bibliographic database 245
Unix-5,
MULTAN (2), multiple string alignment, FORTRAN 77 51

VAX 11/750,
file transfer, MS-Ed-Seq, Ericsson PC 41
VAX 785,
TREE, RNA secondary structure comparison, VAX-Pascal 205
VAX 8600,
image-processing package, genome mapping, FORTRAN 77 101
motifs, probability-generating functions, FORTRAN 77 89
nucleotide sequences, new motifs, FORTRAN 77 293
TREE, RNA secondary structure comparison, VAX-Pascal 205
VAX-Pascal,
TREE, RNA secondary structure comparison, VAX 8600/VAX 785 205
VAX/VMS,
interactive protein sequence comparison, FORTRAN 77, SUN 3/4, MICROVAX II/3200 107
multiple sequence alignment, C language 115
VaxII/780,
multiple sequence alignment, homologous proteins, BESTMULT/BESTMATCH, FORTRAN 77 141
VMS Pascal,
sequence data entry, keyboard/sonic digitizer input, GELENT, MicroVAX II 155
